Keep things rolling with Lean Logistics

Benefits

- Improve work flow
- Reduce handling costs
- Enable reduction of stock level
- Reduce need for floor space
- Improve ergonomics
- Fast and safe truck loading

Start by implementing Lean Logistics in-house...

Whether you are an OEM or a sub-supplier, changing from pallets to wheels is the most important decision when deploying Lean Logistics.

Ensuring more efficient, forklift-free internal logistics can cut the costs of inventory, handling and in-house transportation. Increased efficiency also means space optimisation, shorter turnaround times and better health & safety for staff. Smooth in-house logistics will fully support Lean production principles.

Internal logistics

Move from pallets to wheels to increase efficiency in internal logistics.

External logistics

Choose a solution that allows for effortless transfer from wheels to pallets and from pallets to wheels.

...and then take Lean Logistics onto the road

Standardized integrated transport systems improve delivery efficiency and precision, creating an optimised supply chain.

Choosing the K.Hartwall Lean Solution for in-house logistics lets you expand with wheeled logistics both upstream and downstream in your supply chain.

The Lean Adaptor Pallet enables swift and efficient loading, securing and unloading of wheeled units.
